

2014 Pacific Student Quaternary Meeting

April 22nd/23rd

You are invited to attend the first Pacific Student Quaternary Meeting, hosted by the Earth Science and Geography Departments at Simon Fraser University, Vancouver, April 22nd and 23rd.

This student-led mini-conference is designed to encourage discussion and interaction among students interested in Quaternary Science and provide exposure to the wider Quaternary community.

This meeting is for all graduate and undergraduate students working and studying in the field of Quaternary Science in the Pacific region, looking broadly at environmental change during the last 2.6 million years, at all spatial and temporal scales.

Quaternary Science is multidisciplinary and related fields include archaeology, geomorphology, sedimentology, stratigraphy, paleoenvironment, paleoecology, paleoclimatology, geochronology, oceanography etc.

If this applies to you, you are invited to come to meet and engage with like-minded students and present your research in a casual and friendly atmosphere.

Supported by:

- Halpern Centre,
Simon Fraser University

- Oral presentations and
poster sessions of
student research

- Free registration for all
presenters

- Student-led pre-
conference field trip to
interior BC

- Special Guest speaker:
Prof. John Clague
